lava wool®

technology by **GORDINI**

FINAL PUSH. NO SWEAT.

Photographer: Neal Mueller
Location: Liberty Ridge,
Mount Rainier, Washington

Engineered by GORDINI® to weave the warmth of wool with the comfort and wicking of fleece, LAVA WOOL® is scientifically proven and field tested to draw moisture away from the skin and release it faster than wool or any other cold weather fabric, keeping you drier and warmer.

Visit www.GORDINI.com to see the science behind LAVA WOOL® and a complete selection of gloves, socks, face protection and base layer in this revolutionary fabric.

**KEEP THE
HEAT™**
